THE MOULDINGS

shown on the following pages for

BEAUTY, DESIGN, QUALITY AND PRICE

ARE UNEXCELLED.

AVERY LIBRARY
COLUMBIA UNIVERSITY

All our Mouldings, except a few of the very narrow patterns, are made in 12-foot lengths. They are wrapped for packing two or four lengths in a bundle. Customers should alwas order an even number of lengths 24 ft., 48 ft., 72 ft., 96 ft., etc., as we can pack and ship them more securely and safely than odd lengths.

We Carry a Full and Complete Line of the Following Goods:

Pictures in Sheet and Framed, Mirrors and Hat Racks.
Cabinet and Shade Hardware, Window Shades.
Wooden Ware and Furniture Novelties.

FRAMES MADE TO ORDER.

We will make up frames to order from any of the mouldings shown in this catalogue at the following discount from the list or catalogue price of the moulding. First find the number of feet of moulding required for the frame by the table to the right. Multiply this by the catalogue price, per foot, of the moulding, and from this amount deduct one-tenth or 10 per cent., if list price of the moulding is 10 cents per foot, and up to 20 cents.—Deduct one-fifth or 20 per cent., if list price of moulding is 20 cents per foot and up to 30 cents.—Deduct ¼ or 25 per cent., if list price moulding is 30 cents per foot and up to 40 cents.—Deduct ⅓ or 33⅓ per cent., if list price of moulding is 40 cents per foot and over. No discount allowed on mouldings listed at less than 10 cents per foot. Special prices quoted where quantity is wanted.

Explanation of Table.

To find the number of feet of moulding required for a frame, add length and with of frame together, then find the corresponding number in the left hand column of table; run your finger along this line to the right until it is under the width of the moulding wanted, as shown in upper line of figures; the figures there found will show number of feet required for the frame.

Example.

Suppose you want price of an 18x22 inch frame of No. 9494 moulding, it is 2 inches wide, price 34 cents per foot; add length and width—18 and 22 making 40; find 40 in left hand column, run your finger to the right until under the width, figure 2 at top; you find it takes 8 feet of moulding, which at 34 cents per foot makes $2.72; deduct one-third or 33⅓ per cent. from this, and it leaves $1.82 as net cost of frame.

The difference between above discount and our regular 50 per cent. for moulding in the length is to cover cost of joining, materials used and waste, which occur in cutting mouldings.
